Dear Sir/Madam

I am writing this letter to express my interest in Schlumberger Technical Services for an eight week internship opportunity in summer 2017. I am interested in exploring the possibilities of working as a mechanical engineering trainee at your company.

I expect to graduate in Spring 2017 from the American University of Sharjah (AUS) with a Bachelor of Science in Mechanical Engineering (ABET accredited). I have studied a range of courses and completed a number of laboratories which have helped me develop my engineering knowledge and skills. Interning as a Mechanical Field Engineer at Schlumberger will help me gain first hand exposure to the oil and gas industry based on knowledge acquired from courses such as Fluid Mechanics, Thermodynamics, Material science, Mechanical Design and Manufacturing. I have also worked on various individual and team projects which have helped me to strengthen my knowledge and enhance my experience.

Moreover, the description of the different leadership events and volunteer work, the different cultural clubs I am affiliated with, my achievements as an active student in AUS, together with details of my computer skills, linguistic skills, work experience, and personal attributes can be viewed in the enclosed résumé.

If I am accepted for the internship program, working as an intern for Schlumberger I am sure will gain me valuable industry experience, enable me to learn new ideas as well as improve my social, communication and interaction skills. I hope to be considered as one of the possible interns at Schlumberger Technical Services.

Sincerely,

Ramy Abdeljaleeel
